

2012

ANINA FAUL, RAEESAH FAZLUDDIN, CHRISTINE KOPSCH and RISHALIN

NAIDOO ACHIEVE OUTSTANDING MATHS and SCIENCE RESULTS IN 2012.

Another very successful year for Maths Success students. Here is some background as to how Anina, Raeesah, Christine and Rishalin managed to achieve them.

ANINA FAUL from Kingsmead College started her lessons with me in 2009 when she was in Grade 9. She was keen to get above average results in maths and science and wanted to be ready to take Advanced Programme Mathematics in Grade 10. Anina worked hard over the years achieving distinctions in Maths, AP Maths and Science all the way to matric. In November exams she achieved 92% for Maths, 92% for Maths Paper 3, 94% for AP Maths and 84% for Science.

Anina was the youngest of 3 sisters that came to Maths Success. Her sister Chiara started her lessons in 2006, when she was in Grade 11. Chiara was finding Science very difficult and needed help. She was determined to succeed and in 2007 matric exams achieved a distinction not only in Science, but also in Maths and AP Maths.

Anina's sister Kalinka started her lessons in Grade 10 in 2007. She was concerned about her AP Maths marks and needed help. With my help and her splendid efforts she achieved distinctions not only in AP Maths, but in Maths and Science as well.

A truly remarkable three young women who wanted to succeed and achieved their dreams.

RAEESAH FAZLUDDIN, also from Kingsmead College, started her lessons at Maths Success in 2009, when she was in Grade 9. Her hard work and perseverance paid off and she achieved distinctions in Maths and Science in her November exams.

CHRISTINE KOPSCH started her lessons at Maths Success in February

last year. I will let her mother, Jenny, tell the story as she wrote it on LinkedIn:

“Kazik provided an invaluable service to my daughter Christine, when she decided that she wanted to go to medical school but had not studied Physics, Chemistry or Maths to the required level. Kazik tutored her over the period of 8 months and she was able to write and pass her first year Physics and Chemistry exams and went on to be accepted into the Graduate Entry Medical Programme at Wits. Thank you Kazik for your support and excellent tutoring skills.”

RISHALIN NAIDOO from Redhill High School started his lessons in February last year. Like Christine, he also wanted to go to Medical School and needed a distinction in maths. His efforts were well rewarded and he achieved a distinction in Maths and Maths Paper 3. I also helped him to prepare for a National Benchmarking Test where he obtained a magnificent 94%. For those reasons he was accepted into the first year of study at Wits Medical School this year.

Well done to Anina, Raeesah, Christine and Rishalin for believing in themselves and achieving such outstanding results.
